### AVVERTENZE:

Mosaico Lacca e Decoro Lacca prevedono l'applicazione di smalti artistici che, durante la cottura della ceramica, generano sfumature di colore che possono anche non risultare perfettamente abbinabili ai rispettivi fondi, queste peculiarità differiscono da una produzione all'altra. Questi decori ceramici sono realizzati mediante processi tecnologici ad elevata componente artigianale, lievi differenze superficiali sono perciò da considerarsi peculiarità del prodotto e non ne costituiscono difetto. Si consiglia di pulire con acqua o detersivi a pH neutro, nel caso di sporco ostinato è consigliato utilizzare ammoniac o candeggina, possibilmente diluite con acqua. Non utilizzare per la pulizia prodotti anticalcare.

### WARNING:

Mosaico Lacca and Decoro Lacca provide the application of artistic glazes that, during the firing of ceramics, generate shades of color that may not be perfectly matched to their backgrounds. These peculiarities differ from one production to another. These ceramic decorations are made using technological processes with a high level of craftsmanship; slight surface differences are therefore to be considered as characteristics of the product and do not constitute a defect. It is recommended to clean with water or pH-neutral detergents; in the case of persistent dirt, it is recommended to use ammonia or bleach, possibly diluted with water. Do not use descaling products for cleaning.

### HINWEIS:

Zur Reinigung keine Anti-Kalk-Produkte verwenden.

Ces décors en céramique sont réalisés suivant des processus technologiques à forte composante artisanale ; par conséquent de légères différences visibles à leur surface doivent être considérées comme des spécificités du produit et ne constituent pas un défaut. Il est conseillé de les nettoyer avec de l'eau ou des détergents à pH neutre. En cas de taches tenaces, il est conseillé d'utiliser de l'ammoniac ou de l'eau de Javel, si possible dilués dans l'eau. ## LEED CERTIFICATION

I prodotti di ITALGRANITI GROUP rispondono ai requisiti richiesti dalle certificazioni LEED. I crediti LEED forniscono a tutte le parti interessate gli strumenti necessari per calcolare in modo oggettivo l'impatto di uno stabile in termini di sostenibilità ambientale. Il sistema si basa sull'attribuzione, per ciascuno dei requisiti caratterizzanti l'eco-compatibilità di un edificio, di crediti che, sommati tra loro, danno il livello di certificazione ottenuto: più alto è, più cresce il valore competitivo dell'immobile sul mercato. I nostri prodotti non rilasciano sostanze tossiche e non contribuiscono all'effetto isola di calore; inoltre, escono da uno stabilimento dotato di sistema di gestione ambientale certificato. Per realizzarli viene utilizzata una percentuale certificata di materiale riciclato superiore al 20% (materiale pre-consumo). Questa certificazione è stata rilasciata da Bureau Veritas Italia S.p.A.

ITALGRANITI GROUP's products meet the requirements of LEED certifications. LEED credits provide all interested parties with the necessary tools to objectively calculate the impact of a building in terms of environmental sustainability. The system is based on the attribution - for each of the requirements characterising the eco-compatibility of a building - of credits that, added together, give the level of certification obtained: the higher it is, the greater the competitive value of the building on the market. Our products do not release toxic substances and do not contribute to the heat island effect; moreover, they come from a plant with a certified environmental management system. A certified percentage of more than 20% recycled material (pre-consumer material) is used to manufacture them. This certification was issued by Bureau Veritas Italia S.p.A.

Italgraniti Group è membro del Green Building Council Italia, organizzazione che promuove la cultura e la pratica dell'edilizia sostenibile in un contesto che rispetti le esigenze dell'uomo, della collettività e dell'ambiente.

Italgraniti Group is a member of the Green Building Council Italia, an organisation that promotes the culture and practice of sustainable construction in a context that respects the needs of mankind, of the collective whole and of the environment.

Il GreenGuard è una Certificazione di Prodotto Ambientale che attesta l'emissione di bassi livelli di sostanze chimiche, come ftalati, benzene, ammine e formaldeide. Ha particolare importanza per quelle aziende che, come ITALGRANITI GROUP, partecipano a forniture contract legate a protocolli di green building, come il LEED statunitense. Questi sistemi di rating attribuiscono all'edificio un punteggio basato sui materiali che esso impiega. Insieme ad altre certificazioni, GreenGuard assegna al prodotto impiegato un credito che concorre a definire il punteggio dell'edificio. Nata negli USA per volontà di un organismo senza fini di lucro, GreenGuard prevede che i prodotti siano sottoposti a test scientifici indipendenti e a un monitoraggio continuo delle emissioni chimiche. Ottengono la certificazione quei prodotti che ne soddisfano gli standard rigorosi, basati su criteri stabiliti da importanti agenzie di salute pubblica.

The GreenGuard is an Environmental Product Certification that certifies the emission of low levels of chemicals, such as phthalates, benzene, amines and formaldehyde. It has particular importance for those companies that, like ITALGRANITI GROUP, participate in contract supplies linked to green building protocols, such as the US LEED. These rating systems give the building a score based on the materials it uses. Together with other certifications, GreenGuard assigns the product used a credit that contributes to the building's score. Created in the US by a non-profit organisation, GreenGuard requires products to undergo independent scientific testing and continuous monitoring of chemical emissions. Those products that meet strict standards, based on criteria set by leading public health agencies, are certified.

All Italgraniti collections contribute towards obtaining WELL™ credits.

## CAM ISO 14021

I Criteri Ambientali Minimi (CAM) sono i requisiti ambientali ed ecologici definiti dal Ministero dell'Ambiente. Con decreto 23 giugno 2022 il Ministero della Transizione Ecologica ha disposto la loro revisione (Criteri ambientali minimi per l'affidamento del servizio di progettazione ed esecuzione dei lavori di interventi edilizi). I CAM mirano a facilitare l'inserimento di requisiti di eco-sostenibilità nelle gare d'appalto per interventi pubblici. L'obiettivo è quello di stimolare acquisti che minimizzino l'uso di risorse naturali e il consumo di energia, che contribuiscano inoltre alla diffusione di fonti rinnovabili, riducano la produzione di rifiuti, le emissioni inquinanti nell'aria, nell'acqua e nel suolo ed che eliminino le sostanze ambientalmente pericolose. Grazie ad un sistema di gestione ambientale sostenibile, alla certificazione EPD e in accordo con lo standard internazionale ISO 14021, Italgraniti contribuisce ad un'edilizia di qualità e prestazioni al di sopra della media di settore.

The Minimum Environmental Criteria (CAM) are the environmental and ecological requirements defined by the Italian Ministry of the Environment. By decree of 23 June 2022, the Ministry of Ecological Transition ordered their revision (Minimum Environmental Criteria for the awarding of design and execution services for building works). CAM aims to facilitate the inclusion of eco-sustainability requirements in tenders for public operations. The aim is to stimulate purchases that minimise the use of natural resources and energy consumption levels, which also contribute towards the spread of renewable sources, reducing waste production, polluting emissions into the air, water and soil, and which eradicate environmentally hazardous substances. Thanks to a sustainable environmental management system, to the EPD certification and in accordance with international standard ISO 14021, Italgraniti contributes towards quality construction with performance levels above the industry average.
